THIS IS UNEVALUATED INFORMATION

25X-

Medium-wave transmitter SM VIII, being constructed by VWS Funkwerk Roepenick, has the same transmitter units as the SM I and SM IV transmitters. The buildings in the field housing the mechanical units of these transmitters will differ from each other, although the extent to which they will differ is not known. However, the difference will not affect the effectiveness of the transmitters. The SM III is a twin transmitter with the same transmitter units as the other transmitters have.
